

BEAST ACADEMY

By Art of Problem Solving

Your school has selected Beast Academy as a math curriculum for your student. Here is a little bit about us!

● MASTERY, NOT MEMORIZATION

We designed the curriculum we wish we had growing up – one that is monstrously engaging, rigorous, and comprehensive. Students learn higher-order reasoning skills and how to think critically – not just how to memorize.

● A PROBLEM SOLVER'S SKILL STACK

BA students regularly tackle tough problems. In doing so, they gain a skill stack that extends far beyond math alone. They gain resilience, creativity, and perseverance that can be used in any field of study.

● ENDLESS GAMES AND PUZZLES

With 20,000+ problems, puzzles, and skill games across our practice books and online sessions, students never run out of content.
